GLOSSARY

Sharpe Ratio

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

Beta

Beta (β) of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measures the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

Standard Deviation

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

Risk Free Return

The theoretical rate of return of an investment with safest (zero risk) investment in a country

Total Expense Ratio

Total expense ratio (TER) means the ratio of total of all expenses charged to the investors of the scheme to the total asset under management of the scheme.

Tracking Error

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Residual Maturity

Weighted Residual Maturity of the securities in scheme.

Portfolio Yield (Yield To Maturity)

Weighted average yield of the securities in scheme portfolio.

Portfolio Turnover Ratio

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

Modified Duration

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

Macaulay Duration (Duration)

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero-coupon securities where they are the same.

HOW TO READ FACTSHEET

Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the NIFTY, SENSEX, BSE200, BSE500, 10-Year Gsec.

IDCW Option

In line with applicable SEBI guidelines, with effect from April 1, 2021, the name of "Dividend Option" under the Schemes stand revised as "Income Distribution cum Capital Withdrawal (IDCW) Option". IDCW Option may offer Payout and Reinvestment Sub-options / facilities.

Investors may note that the amounts can be distributed out of investor's capital (Equalization Reserve), which is part of sale price that represents realized gains.

Dividend / IDCW

"Dividend" / "IDCW" means income distributed on Mutual Fund Units from the distributable surplus, which may include a portion of the investor's capital (i.e. part of Sale Price (viz. price paid by the investor for purchase of Units) representing retained realized gains (equalisation reserve) in the Scheme books).

Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta Ratio (Portfolio Beta)

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Average portfolio PE (Average P/E)

It is price to earnings ratio of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio price to book ratio (Average P/BV)

It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio dividend yield (Average Dividend Yield)

It is dividend yield of the stocks calculated for the entire portfolio on a weighted average basis.

Net Equity

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

R Squared

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Macroeconomic Update

Jun'26 marked a significant breakthrough in the West Asia conflict, with the US and Iran signing a 14-point memorandum that brought a temporary pause to hostilities and effectively reopened the Strait of Hormuz. As commodity prices, particularly crude oil, declined, US consumer sentiment improved. Growth in US continue to hold up well driven by strong AI/tech related investment demand and even though non-farm payroll was lower than expected in June, the labour markets remain resilient with unemployment rate declining marginally. In Europe, the business activity returned to expansionary territory as easing commodity prices helped reduce input cost pressures. China witnessed another strong month of exports driven by AI hardware even as domestic demand and property investments continue to remain subdued.

US CPI inflation hit 4.2%YoY in May'26 (highest since April-23), driven mainly by a spike in energy costs due to West Asia conflict. Core CPI too remained elevated at 2.8% YoY. In Jun'26 meeting Fed remained on hold although with a hawkish pivot as 9 of 18 officials expect at least one rate hike by end of 2026, a reversal from March's projections, which had shown a median forecast of one rate cut for 2026. ECB and BoJ both hiked policy rate by 25bps in June as inflation rose on the back of higher energy prices.

Economic activity in India remained resilient in June 2026: The high frequency indicators for June suggest that economic activity continue to hold up well. Vehicle registrations and power demand recorded another month of strong growth, along with sharp pick-up in GST collections and e-way bill generation. Manufacturing and services PMI moderated in June compared to May but remain firmly in expansion zone.

Going forward, growth is likely to remain steady which is likely to be supported by continued momentum. Ceasefire between US and Iran and resultant restoration of supply chains bode well from growth perspective. The prospects of lower-than-expected south-west monsoon, however, is likely to adversely affect agriculture production and rural demand this year.

Government expenditure growth on a strong footing: Total Government expenditure has grown by 18.1% YoY in 2MFY27 driven by both revex and capex. Tax collections growth, however, remain muted dragged down by GST collections growth (as GST rates were reduced in September 2025) even as direct tax collection growth has been decent. A combination of higher expenditure and lower tax collections growth has meant that fiscal deficit has expanded compared to the same period last year. Fall in fertilizer and crude oil prices bode well from fiscal deficit perspective and any minor shortfall in revenue can be met through economic stabilisation fund and/or expenditure rationalisation.

CPI inflation inched up in May 2026: CPI inflation rose in May but remained contained and was below market expectations. The rise in inflation was driven by food and transport segment. While inflation in transport segment was driven by higher retail prices of petrol and diesel, food inflation rose primarily due to rise in vegetable prices. Core inflation excluding precious metals also rose by 40bps due to rise in various goods and services but remains benign.

Going forward, inflation is likely to inch up in FY27 on adverse base effect, and a prospect of a below normal monsoon but is likely to be within the RBI's tolerance band. The geo-political situation and monsoon progress remains a key monitorable from an inflation perspective.

Trade deficit remained unchanged in May 2026: Trade deficit remained steady in May as increase in net oil imports was offset by a fall in net gold and net non-oil, non-gold imports. Going forward, upward pressure on trade deficit is likely to ease as ceasefire between US and Iran is likely to result in lower crude and other commodity prices. Moreover, healthy growth in services exports will help keep CAD within manageable levels.

Commodity fall in June 2026: Crude oil prices declined significantly in Jun-26 following ceasefire between US and Iran and opening of Strait of Hormuz. The easing of geo-political tensions also led to fall in most commodity prices during the month.

Summary and Conclusion

The breakthrough in West-Asia conflict is a huge positive for global supply chains, which were disrupted by the blockade of Strait of Hormuz. The resultant fall in crude oil and other commodity prices bode well for both growth and inflation dynamics for the global economy. Growth in the US so far has held up well on the back of AI/tech related capex and higher Government spending. Recent data also point towards resilient labour markets conditions in US. Growth in China is following a two-speed path where domestic consumption, investments and property markets are in a slow lane, but exports and manufacturing are holding up well.

Contrary to expectations, growth in India held up remarkably well despite disruptions caused by West Asia crisis. High frequency indicators have steadily improved over the last few months with rural demand continuing to hold up well and urban demand too showing signs of uptick. Inflation remains well anchored and though it's expected to rise from here on due to adverse base effects and deficient monsoon, it's unlikely to increase significantly. RBI has projected an average inflation of 5.1% in FY27.

Looking ahead, the medium-term outlook for the Indian economy seems optimistic, in our view. This optimism is driven by steps taken by RBI and Government, opportunities arising from shift in the global supply chain, momentum of private consumption sustaining due to income tax relief and lower borrowing cost. However, resumption of hostilities between US and Iran and significantly below normal monsoon remain key risks to growth this year.

Debt Market Update

Fixed income markets rallied across the curve in June as the news of ceasefire between US and Iran led to significant fall in crude oil and other commodity prices. Fixed income markets also took comfort from measures announced by RBI to attract capital flows in its June meeting. As a result, yields on 10-year G-sec ended the month with decline of 25bps while that on 10Y AAA corporate bonds witnessed a sharper fall resulting in spread between the two compressing by 22bps. Key events which influenced yields during the month were ceasefire announcement by US and Iran, RBI's steps to attract capital flows in its June meeting and Federal Open market Committee (FOMC) decision to hold rates while sounding more hawkish. The table below gives a summary view of the movement of key rates and liquidity:

	May-26	Jun-26	Change (in bps)
MIBOR Overnight Rate (%)	5.52	5.50	-0.02
3M Gsec yield (%)	5.56	5.25	-0.31

*Average net daily liquidity infused / absorbed through Liquidity Adjustment Facility, exports refinance, marginal standing facility and term repos/reverse repos.

Source: Bloomberg, RBI

Average net liquidity surplus declined to ~785 billion in June compared to surplus of ~INR1.6 trillion in May driven by advance tax and GST related outflows along with forex intervention by RBI and rise in currency in circulation.

In the debt market, FPIs ended the month with net buying of USD 5.6 billion in June 2026 (May 2026 net buy: USD 466 million). This was primarily driven by steps announced by RBI and Government to attract capital flows in June which include:

- Expanding the universe for Government securities to include all new issuances of 15, 30 and 40 years maturity under the Fully Accessible Route (FAR). Additionally, FPI limits on short-term investments under the general route have been removed.
- Withdrawing capital gains and withholding tax on returns from investments in G-secs
- Increasing limits for investment by NRIs and OCIs in equity market without SEBI registration and extending it to all individual Persons Resident Outside India (PROIs) at par with NRIs and OCIs
- Allowing concessional forex swap till 30th September 2026 to incentivize External Commercial Borrowings by Public Sector Undertakings.
- Providing full hedging cost till 30th September 2026 for raising fresh 3-5-year FCNR (B) deposits by Authorized Dealers/Banks

Outlook

Fixed income market outlook

Indian fixed markets rallied across the curve as policy measures announced by the RBI to attract capital flows in its June meeting and ceasefire between US and Iran lifted sentiments. The debt markets also witnessed strong buying from FPIs during the month as RBI's steps to attract capital flows is likely to address multiple concerns in one go - improve capital flows, stabilise currency, shore up forex reserves, improve system liquidity, moderate credit to deposit ratio for banks, and result in money market and corporate bond yields drifting lower. The ceasefire between US and Iran is likely to reduce pressure on India's CAD.

Going forward, while the geo-political uncertainty persists, we believe outlook on Indian fixed income market has improved considerably as:

- Fall in oil prices on the back of opening of Strait of Hormuz bode well from inflation, CAD and BoP perspective
- Measures to attract capital flows should help ease pressure on INR, improve liquidity and moderate credit to deposit ratio of banks.
- Inflation is likely to remain within the tolerance band despite adverse base effect and prospect of below normal monsoon which reduces risk of significant rise in policy rates
- Liquidity is likely to be in surplus in the coming months in view of likely increased foreign flows due to steps taken by the RBI.
- Supply and demand dynamics for SLR is favourably placed in view of likely revival of demand from Banks (due to lower SLR holding) and Pension funds. Moreover, there is potential of OMOs purchases in H2FY27 depending upon how RBI intervenes in forex markets on receipt of capital flows under measures announced last month.
- Risk of fiscal slippage has diminished due to significant fall in crude oil and fertilizer prices

Key risks to the favourable outlook

- Any flare up in hostilities in West Asia leading to disruption of supply chain and rise in crude oil prices
- El Nino conditions in FY27 leading to large deficiency in southwest monsoon and uptick in food and overall inflation

Looking ahead, despite global uncertainty, in our view, the medium to term outlook for Indian fixed income remains optimistic. Steps taken to attract foreign capital flows, ample systemic liquidity and balanced supply demand dynamics for government securities provide meaningful support. With inflation expected to remain within RBI's tolerance band, the likelihood of rate hikes appears limited. In view of the elevated spread of money market instruments and corporate bond over Gsec / repo rate, one may consider investment in short to medium duration (schemes with duration of up to 5 years) categories, especially corporate bonds focused funds. Further, in view of the steep sovereign curve and given the inclusion of all new issuances of 15, 30 and 40 years maturity under the Fully Accessible Route (FAR), one may consider investment in schemes with longer duration from a medium-term perspective, in line with individual risk appetite. Key risks to monitor include any flare up in conflict or adverse food price movement due to weak monsoon.

Equity Market Update

The month of June 2026 witnessed broad based rally for Indian equity markets as US and Iran announced temporary pause to hostilities which effectively opened the Strait of Hormuz. While Nifty 50 Index/Sensex Index rallied by 1.4%/2.3% respectively, small caps ended with gain of 4%. While Banks, healthcare and Autos outperformed during the month, Power, Metal and IT underperformed.

Most global equity markets ended the month with decline except for markets of Japan, France and China, which registered gain. Below are detailed tables outlining the performance of key domestic and global indices:

Given the global uncertainties and aggregate valuation being higher than historical average, the importance of stock selection increases even more.

Over medium to long term, we remain optimistic on Indian equities considering key trade deals, attractive domestic growth outlook, healthy corporate profitability, and supportive pro-growth policies like income tax and GST relief to consumers. However, near-term risks include risk of flare up in geo-political tensions and cyclical moderation in corporate earnings.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. The Scheme, formerly a large cap fund, has undergone change in Fundamental attributes w.e.f. May 23, 2018 and become a Large and Mid-cap Fund. Accordingly, the Scheme's benchmark has also changed. HDFC Growth Opportunities Fund has been renamed as HDFC Large and Mid Cap Fund w.e.f. June 28, 2021. Hence, the past performance of the Scheme may not strictly be comparable with that of the new benchmark. As BSE SENSEX TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of BSE SENSEX PRI values from February 18, 1994 to August 18, 1996 and TRI values since August 19, 1996. \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). For performance of other schemes managed by Gopal Agrawal, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of balanced nature of the scheme where a portion of scheme's investments are made in debt instruments. \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). As NIFTY 50 TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of NIFTY 50 PRI values from February 1, 1994 to June 29, 1999 and TRI values since June 30, 1999. For performance of other schemes managed by Gopal Agrawal, Srinivasan Ramamurthy, Arun Agarwal, Nandita Menezes & Anil Bamboli, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Note: @@Effective close of business hours of June 1, 2018, HDFC Prudence Fund merged with HDFC Growth Fund (HDFC Balanced Advantage Fund after changes in fundamental attributes). As the portfolio characteristics and the broad investment strategy of HDFC Balanced Advantage Fund is similar to that of erstwhile HDFC Prudence Fund, the track record (i.e. since inception date, dividend history, etc.) and past performance of erstwhile HDFC Prudence Fund has been considered, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

HDFC Hybrid Equity Fund

An open ended hybrid scheme investing predominantly in equity and equity related instruments

CATEGORY OF SCHEME
AGGRESSIVE HYBRID FUND

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to generate capital appreciation / income from a portfolio, predominantly of equity & equity related instruments. The Scheme will also invest in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Srinivasan Ramamurthy & Anupam Joshi, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Note: @@ Effective close of business hours of June 1, 2018, HDFC Balanced Fund merged with HDFC Premier Multi Cap Fund (HDFC Hybrid Equity Fund after changes in fundamental attributes). As the portfolio characteristics and the broad investment strategy of HDFC Hybrid Equity Fund is similar to that of erstwhile HDFC Balanced Fund, the track record (i.e. since inception date, dividend history, etc) and past performance of erstwhile HDFC Balanced Fund has been considered, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes w.e.f. May 23, 2018 and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark has also changed. Hence, the performance of the Scheme from inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Anil Bamboli, Bhagyesh Kagalkar, Arun Agarwal & Nandita Menezes, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark and additional benchmarks have also changed. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments.

Performance has been computed using values of the concerned benchmarks. From inception till December 31, 2017, the benchmark was CRISIL MIP Blended Index. It was then revised to CRISIL Hybrid 85+15 Conservative Index from January 1, 2018 to March 27, 2018, and to NIFTY 50 Hybrid Composite Debt 15:85 Index from March 28, 2018 to May 22, 2018. Between May 23, 2018 and July 25, 2023, the benchmark comprised 90% NIFTY 50 Hybrid Composite Debt 65:35 Index + 10% Domestic Price of Gold. From July 26, 2023 to December 9, 2025, it was 65% NIFTY 50 TRI + 25% NIFTY Composite Debt Index + 10% Domestic Price of Gold. Effective December 10, 2025, the benchmark is 65% NIFTY 50 TRI + 22.5% NIFTY Composite Debt Index + 10% Domestic Price of Gold + 2.5% Domestic Price of Silver.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

An open ended scheme investing in equity, arbitrage and debt

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in equity instruments. For performance of other schemes managed by Srinivasan Ramamurthy & Anupam Joshi, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

Note: Effective close of business hours of May 25, 2018, HDFC MF Monthly Income Plan - Long Term Plan (MIP-LTP) underwent changes in Fundamental Attributes and was renamed as HDFC Hybrid Debt Fund (HHDF) and HDFC MF Monthly Income Plan - Short Term Plan was merged therein. As the portfolio structuring of HHDF closely resembles the erstwhile MIP-LTP, the past performance of MIP-LTP is provided, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

HDFC Low Duration Fund

An open ended low duration debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 6 months and 12 months (Refer page 2 for definition of Macaulay Duration). A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME
LOW DURATION FUND

INVESTMENT OBJECTIVE: To generate income / capital appreciation through investment in debt securities and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Bhavyesh Divecha, Praveen Jain & Anil Bamboli, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

HDFC Income Fund

An open ended medium term debt scheme investing in instruments such that the Macaulay Duration of the Portfolio is between 4 years and 7 years (Refer page 2 for definition of Macaulay Duration). A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME
MEDIUM TO LONG DURATION FUND

INVESTMENT OBJECTIVE: To generate income / capital appreciation through investments in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR) For performance of other schemes managed by Anupam Joshi, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

Note: Effective close of business hours of May 8, 2018, HDFC Medium Term Opportunities Fund (HMTOF) underwent changes in Fundamental Attributes and was renamed as HDFC Corporate Bond Fund (HCBF) and HDFC Floating Rate Income Fund - Long Term Plan and HDFC Gilt Fund - Short Term Plan were merged therein. As the portfolio structuring of HCBF closely resembles the erstwhile HMTOF, the past performance of HMTOF is provided, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Praveen Jain and Bhavyesh Divecha, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Note: Effective close of business hours of May 8, 2018, HDFC Corporate Debt Opportunities Fund (HCDOF) underwent changes in Fundamental Attributes and was renamed as HDFC Credit Risk Debt Fund (HCRDF) and HDFC Regular Savings Fund was merged therein. As the portfolio structuring of HCRDF closely resembles the erstwhile HCDOF, the past performance of HCDOF is provided, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

HDFC Dynamic Debt Fund

An open ended dynamic debt scheme investing across duration. A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME

Returns greater than 1 year period are compounded annualized (CAGR) For performance of other schemes managed by Srinivasan Ramamurthy & Anil Bamboli, please refer page 107. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 112 to 119. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in equity instruments

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Tax Benefits/Consequences: For detailed information on tax benefits/consequences, refer to the Scheme Information Document available on www.hdfcfund.com. Investor's should be aware that the fiscal rules / tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his / her own professional tax advisor.

Applicability of Stamp Duty: Effective July 1, 2020, in accordance with the amendment to the Indian Stamp Act, 1899, a stamp duty @ 0.005% of the transaction value would be levied on applicable mutual fund purchase transactions (including transactions carried through stock exchanges and depositories for units in demat mode). Thus, the number of units allotted on all the applicable mutual fund transactions would be reduced to the extent of levy of stamp duty. Kindly refer to FAQs on Stamp Duty, for details on the nature of transactions and the rate of levy of stamp duty available on our website

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 123 to 138.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 123 to 138.

#CRISIL Short Duration Debt A-II Index ##CRISIL 10 Year Gilt Index.

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 123 to 138.

#65% Nifty 50 TRI + 22.5% Nifty Composite Debt Index + 10% Domestic Price of Gold + 2.5% Domestic Price of Silver ##Nifty 50 Index (TRI).

The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark and additional benchmarks have also changed. Hence, the past performance of the Scheme since inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments.

Performance has been computed using values of the concerned benchmarks. From inception till December 31, 2017, the benchmark was CRISIL MIP Blended Index. It was then revised to CRISIL Hybrid 85+15 Conservative Index from January 1, 2018 to March 27, 2018, and to NIFTY 50 Hybrid Composite Debt 15:85 Index from March 28, 2018 to May 22, 2018. Between May 23, 2018 and July 25, 2023, the benchmark comprised 90% NIFTY 50 Hybrid Composite Debt 65:35 Index + 10% Domestic Price of Gold. From July 26, 2023 to December 9, 2025, it was 65% NIFTY 50 TRI + 25% NIFTY Composite Debt Index + 10% Domestic Price of Gold. Effective December 10, 2025, the benchmark is 65% NIFTY 50 TRI + 22.5% NIFTY Composite Debt Index + 10% Domestic Price of Gold + 2.5% Domestic Price of Silver.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 123 to 138.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 123 to 138.
