The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark and additional benchmarks have also changed. Hence, the past performance of the Scheme since inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments.

Performance has been computed using values of the concerned benchmarks. From inception till December 31, 2017, the benchmark was CRISIL MIP Blended Index. It was then revised to CRISIL Hybrid 85+15 Conservative Index from January 1, 2018 to March 27, 2018, and to NIFTY 50 Hybrid Composite Debt 15:85 Index from March 28, 2018 to May 22, 2018. Between May 23, 2018 and July 25, 2023, the benchmark comprised 90% NIFTY 50 Hybrid Composite Debt 65:35 Index + 10% Domestic Price of Gold. From July 26, 2023 to December 9, 2025, it was 65% NIFTY 50 TRI + 25% NIFTY Composite Debt Index + 10% Domestic Price of Gold. Effective December 10, 2025, the benchmark is 65% NIFTY 50 TRI + 22.5% NIFTY Composite Debt Index + 10% Domestic Price of Gold + 2.5% Domestic Price of Silver.

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. Since Inception Date = Date of First allotment in the Scheme / Plan. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 78 to 90.

#CRISIL Money Market A-I Index ##CRISIL 1 Year T-Bill Index.

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. Since Inception Date = Date of First allotment in the Scheme / Plan. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 78 to 90.

#65% Nifty 50 TRI + 22.5% Nifty Composite Debt Index +10% Domestic Price of Gold + 2.5% Domestic Price of Silver ##Nifty 50 Index (TRI).							
The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark and additional benchmarks have also changed. Hence, the past performance of the Scheme since inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments.							
Performance has been computed using values of the concerned benchmarks. From inception till December 31, 2017, the benchmark was CRISIL MIP Blended Index. It was then revised to CRISIL Hybrid 85+15 Conservative Index from January 1, 2018 to March 27, 2018, and to NIFTY 50 Hybrid Composite Debt 15:85 Index from March 28, 2018 to May 22, 2018. Between May 23, 2018 and July 25, 2023, the benchmark comprised 90% NIFTY 50 Hybrid Composite Debt 65:35 Index + 10% Domestic Price of Gold. From July 26, 2023 to December 9, 2025, it was 65% NIFTY 50 TRI + 25% NIFTY Composite Debt Index + 10% Domestic Price of Gold. Effective December 10, 2025, the benchmark is 65% NIFTY 50 TRI + 22.5% NIFTY Composite Debt Index + 10% Domestic Price of Gold + 2.5% Domestic Price of Silver.
