Global Central Bank Highlights

*Data as on June 26, 2026. Source: Csisil Intelligence

- BoE kept interest rates unchanged at 3.75% in Jun-26
- BoJ raised its key short-term policy rate by 25 bps to 1.0% in Jun-26 to curb inflation risks from rising energy costs

Global Bond Yields

*Data as on June 25, 2026. Source: Csisil Intelligence

- US 10-year benchmark Treasury yield eased slightly to 4.44% in June 30, 2026, from 4.45% in May-26, as investors balanced expectations of a prolonged restrictive monetary policy stance against signs of moderating inflation.
- During the early part of the month, Treasury yields moved higher, supported by stronger-than-expected nonfarm payrolls and retail sales data for May-26, which underscored the resilience of the US economy. These data reinforced market expectations that the Federal Reserve could maintain higher interest rates for a longer period.
- Additionally, the Federal Reserve's policy decision on June 16, 2026, to keep its benchmark rate unchanged, while signalling that further rate hikes remained possible to bring inflation back to its 2% target, provided upward pressure on yields.
- However, in the latter half of the month, treasury yields moderated as demand for safe-haven government bonds increased. Market sentiment improved after the release of the May 2026 Personal Consumption Expenditures (PCE) Price Index, the Fed's preferred inflation gauge, which rose less than expected on a monthly basis. This indicated a potential easing in underlying inflationary pressures, even though inflation remained elevated on a year-on-year basis.
- Further support to treasuries came from a sharp decline in crude oil prices towards the end of June, which helped reduce market-based inflation expectations and contributed to the softening in yields.

ECONOMIC OVERVIEW

India's GDP growth

On-quarter GDP growth trend

GDP growth projections for 2026

Source: Ministry of Statistics and Programme Implementation (MoSPI), IMF, OECD

- India's gross domestic product (GDP) grew 7.8% on-year in Q4FY26, compared with an upwardly revised 8.0% in Q3FY26
- In terms of gross value added, the economy grew 7.9%, compared with 8.0%

Industry	Q4FY26 Growth %	Q3FY26 Growth %
Agriculture, Forestry & Fishing	3.6	1.7
Mining & Quarrying	5.4	4.7
Manufacturing	7.3	12.8
Electricity, Gas, Water Supply & Other Utility Service	4.1	1.5
Construction	8.4	6.7
Trade, Hotels, Transport, Communication & Services related to Broadcasting	12.5	11.2
Financial, Real Estate & Professional Services	10.4	11.6
Public Administration, Defense & Other Services	5.8	4.9

- We expect GDP growth of 6.6% on-year in fiscal 2027, compared with 7.7% in fiscal 2026. Higher input cost pressures, the forecast of a below-normal monsoon and softer global growth are expected to weigh on economic growth. However, resilient consumption demand and continued government capital expenditure are expected to provide support. In our base case, we assume moderate softening of energy prices and only a gradual recovery in energy flows amid operational constraints and elevated risk aversion
- A sharp rise in energy and other input costs is expected to be passed on by producers to consumers, raising core inflation. Below-normal rainfall amid El Niño conditions and heatwaves are expected to exert pressure on food inflation.

MARKET REVIEW

India Equity Market Performance

Index performance

Institutional flows

*MF data is as on June 23, 2026. Source: NSE, BSE, SEBI, NSDL (as on June 25, 2026)

- Indian equities witnessed recovery in Jun-26, with benchmark indices ending higher, supported by improving global cues and easing crude oil prices, despite intermittent volatility. Markets remained influenced by mix of domestic policy signals and external developments, including geopolitical trends and foreign fund flows. BSE Sensex gained 2.29% to close at 76,478.67 in Jun-26 from 74,775.74 in May-26, while the Nifty 50 rose 1.35% to 23,865.75 from 23,547.75 over the same period
- Jun-26 began cautiously, as sentiment remained subdued following central bank's policy stance and downward revision of growth forecasts. Mid-month, equities witnessed a gradual improvement in sentiment, supported by easing geopolitical uncertainties and global risk appetite recovery. However, upside remained limited due to foreign fund outflows and weakness in certain sectors
- As the month progressed, markets strengthened, aided by stable macro outlook and robust credit growth. Softer oil prices and supportive global cues helped sustain buying interest, although intermittent volatility persisted. Towards the latter part, equities maintained their positive bias, with domestic resilience and improving external conditions supporting overall sentiment. While global uncertainties persisted, the absence of fresh negative triggers allowed markets to consolidate gains
- FIIs sold equities worth Rs 493 billion in Jun-26, against Rs 822 billion in May-26. DIIs purchased equities worth Rs 530 billion in Jun-26, against Rs 330 billion in May-26, thereby supporting markets
- Sectoral performance reflected a mixed trend, with clear divergence across segments. Banking, realty and healthcare emerged as key gainers. Banking stocks were supported by stable interest rates, strong credit growth and resilient domestic flows. Realty gained on improving demand, while healthcare benefited from defensive characteristics and stable earnings outlook. BSE Bankex, BSE Realty and BSE Healthcare gained 7.31%, 5.43% and 3.75%, respectively
- In contrast, BSE Metal (-8.46%), BSE IT (-5.38%) and BSE Power (-4.05%) ended lower. Metal declined owing to profit booking, weak global demand cues and volatility in commodity prices. IT remained under pressure because of valuation concerns, profit booking, and uncertainty surrounding global technology spending, further influenced by evolving artificial intelligence trends. Power also declined, due to profit booking following earlier gains and absence of fresh triggers

Equity Market Outlook

Global Update: The S&P 500 index and Nasdaq-100 experienced mid-month profit-taking following a powerful early-year rally. After peaking on June 2, 2026, growing concerns over monetary tightening and frothy valuations in mega-cap tech stocks triggered sharp corrections, which drove the indexes down 1.1% and 0.2%, respectively.

In the UK, the FTSE 100 experienced a resilient upward trajectory despite early-month softness and mid-month turbulence—driven by UK economic contraction fears and global mining sell-offs—the index was consistently bolstered by strong performances in banking, defence, and cyclical sectors.

The STOXX Europe 600 Index surged in June 2026, fuelled by easing geopolitical tensions following a preliminary US-Iran deal, resilient earnings, and a major boost in AI-related technology stocks. The pan-European benchmark Stoxx600 index closed 2.5% higher in June 2026.

China's equity market experienced a volatile but ultimately stabilizing June 2026. Early-month tech sell-offs and growth concerns pushed indices to two-month lows. However, a strong late-month recovery driven by stellar export data, rebounding AI stocks, and better-than-expected factory activity helped the markets close the month in positive territory.

Japan's Nikkei 225 secured its best quarterly performance on record powered primarily by artificial intelligence and semiconductor-related shares. The index achieved this historic rally despite early-month profit-taking and brief pullbacks triggered by global tech volatility.

India Update: Indian equities experienced a volatile yet resilient June 2026, closing the month with modest gains. Early consolidation caused by West Asia tensions and an IT-led selloff was offset by easing crude prices and strong domestic buying.

The BSE Sensex gained 2.3% and the Nifty50 gained 1.4% during the month. FPIs sold Rs.49,340 crore in June 2026 compared to outflow of Rs.32,963 crore in May 2026. (Source: NSDL)

Sector-wise, BSE Infotech (-8.9%), BSE Metals (-8.1%) and BSE Power (-3.4%) were laggards, whereas, BSE Bankex (+6.4%), BSE Realty (+5.9%) and BSE Healthcare (+5.3%) gained the most. (Source: BSE)

Our view going forward:

- The world continues to witness the constant 'to and fro' of US-Iran conflict with fragile truce and ceasefires. Although crude prices have come-off, energy dependent countries are now actively seeking alternative energy sources.
- The Rupee has depreciated ~10% in last one year, making it an undervalued currency. Concerns around Current Account Balance eased a bit as Mar 2026 quarter saw a surplus at 0.7% of GDP.
- India's GDP numbers were resilient for FY25-26 as it accelerated to 7.7% in FY26 (vs 7.1% in FY25) reflecting stronger economic activity.
- Other macro indicators too remain robust – Fiscal Deficit is under control, demand environment is good, in the current fiscal, Govt. has kick started capex on a high note.
- However, in the near term we believe markets will be volatile as the uncertainty around the conclusion of US-Iran war remains high. Also, other triggers which may impact markets in near term include a heavy domestic IPO market and high global valuations driven by AI rally.
- Equity valuations continue to remain in neutral zone currently. We continue recommending investing in equities in a staggered manner through SIP/STP in schemes that have the flexibility to maneuver across sectors / market cap.
- Since market volatility may persist in the near term, we also continue to recommend investing in Hybrid / Asset Allocation schemes.

Liquidity in the banking system

Data as on June 30, 2026.

Source: RBI

- The interbank call money rate declined to 5.40% on June 25, 2026, from 5.55% on May 29, 2026, reflecting the RBI's effective liquidity management measures, which helped contain overnight funding costs despite a marginal liquidity deficit in the banking system.
- Meanwhile, the yield on India's benchmark 10-year government security (6.48% GS 2035) fell by 9 basis points to 6.76% in Jun-26, compared with 6.85% in May-26. During the first half of the month, the benchmark yield remained largely range-bound, as investors balanced domestic monetary policy signals against evolving global developments.
- At the start of the month, yields edged higher amid rising concerns over imported inflation and the possibility of tighter monetary conditions. However, following the RBI's policy announcement, yields softened after the central bank kept the repo rate unchanged and introduced measures aimed at attracting foreign capital into domestic debt and equity markets.
- A key policy measure included the expansion of the Fully Accessible Route to cover all new issuances of 15-year, 30-year, and 40-year government securities, allowing foreign investors unrestricted access to these long-duration instruments. This move supported sentiment and contributed to a moderation in yields.
- The downward trend in yields gathered momentum after India's CPI inflation for May 2026 remained below the RBI's 4% medium-term target, reinforcing expectations that domestic inflationary pressures would stay contained and that monetary policy would remain supportive.
- In the latter half of the month, yields eased further, supported by a sharp decline in crude oil prices amid optimism over a potential US-Iran peace agreement, which alleviated concerns about imported inflation. Additionally, softer US Treasury yields provided an external tailwind.
- However, the decline in yields was partly capped by intermittent profit booking, currency-related concerns, and relatively tight liquidity conditions in the banking system.

MARKET OUTLOOK

Fixed Income Outlook

Fixed Income Outlook

Fixed income yields experienced a significant downward trend in June 2026, primarily driven by announcement of tax exemption to foreign investors buying G-secs and due to fall in crude oil prices. Overall, the risk perception in debt market has improved post the US-Iran war truce. Possible bond inclusion news may further support market sentiment. Credit growth pick-up has been strong and policy response has been supportive to growth.

The RBI measures targeting NRI deposits and covering their hedging costs for banks is expected to garner large deposits, and possibly ease CD rates for banks. The measures are also positive for liquidity conditions and may further compress risk premiums on yields in the near term. Hence, the near-term outlook is positive for debt markets.

However, we believe that a major part of the easing in yields may already be over. Hence, we recommend that investors avoid taking aggressive long-term duration calls. Investors should focus on steady carry, capital preservation and risk-adjusted returns.

In fixed income market, we like corporate bonds in the 1- to 3-year duration range. On the sovereign side, we continue to remain positive on long-dated SDLs. Hence, we recommend products in the short term, corporate bond, floating interest and banking & PSU debt category in the current scenario.

Market Activity

The 10-year Indian benchmark bond yield settled at 6.76% on June 30, 2026, down 24 bps compared to 7.00% as on May 29, 2026.

Liquidity conditions turned from surplus to deficit during the month owing to advance tax related outflows during the month.

The 91-day T-bill yield fell 29 bps on-month to 5.24% whereas the 182-day T-bill fell 28 bps to 5.42%. (Source: CCIL)

bps – basis points; T-bill – Treasury Bill; RBI – The Reserve Bank of India; MPC – Monetary policy committee; SDL – State Development Loans. GST – Goods and services tax.

Gold

- Gold prices ended at Rs 1,39,873 per 10 gm on June 25, down 10.38% from Rs 1,56,072 per 10 gm on May 27, 2026 as reported by the India Bullion and Jewellers Association (IBJA)
- Gold prices witnessed a sharp and sustained decline throughout Jun-26, driven by persistent strength in US dollar and evolving global monetary policy expectations. Prices trended lower from the beginning of the month as a stronger dollar reduced the appeal of gold as an alternative investment
- The decline intensified mid-month as renewed expectations of a Fed rate hike further strengthened the dollar and dampened safe-haven demand. As the month progressed, the downtrend persisted with minimal support from global factors, reflecting subdued demand conditions. Towards the end of Jun-26, prices fell further due to profit booking at elevated levels, accelerating the overall decline
- Overall, domestic gold prices recorded a notable correction during the month, as macroeconomic headwinds and technical factors combined to keep the yellow metal under pressure
- However, the upward trajectory was not linear. Intermittent strength in the dollar index triggered short-term corrections, while profit booking at elevated levels led to periodic price declines
- Towards the latter part of the month, gold prices traded in a relatively narrow range. A softer dollar index provided intermittent support, although recurring profit booking limited further upside

Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 30 June 2026

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on June 30, 2026.

The Scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover etc. The ability of the portfolio to meet capital protection on maturity to the investors can be impacted in certain circumstances including changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. Accordingly, investors may lose part or all of their investment (including original amount invested) in the Scheme. No guarantee or assurance, express or implied, is given that investors will receive the capital protected value at maturity or any other returns. Investors in the Scheme are not being offered any guaranteed / assured returns.

IDCW is gross IDCW. To arrive at the net IDCW payable for corporate and non-corporate investors applicable IDCW distribution tax, if any, needs to be adjusted respectively. Past performance may or may not be sustained in future. After payment of IDCW the NAV has fallen to the extent of payout and distribution taxes if applicable. For complete IDCW history details please refer to our website www.icicipruamc.com, Download section-NAV and IDCW history section.

Distribution of IDCW is subject to availability of distributable surplus and approval of Trustees.

When units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

For information on Record Date for declaration of IDCW under various Schemes of the Fund with IDCW distribution frequency ranging from daily up to monthly distribution investors are requested to visit https://www.icicipruamc.com/docs/default-source/default-documentlibrary/icici_013_dividend-addendum_27-march-2021.pdf?sfvrsn=62de3112_0
