Navi Nifty 50 Index Fund

Navi Nifty 50 Index Fund

An open-ended equity scheme replicating / tracking Nifty 50 Index

This product is suitable for investors who are seeking*

- Capital appreciation over the long term
- Equity and equity related securities covered by Nifty 50 Index.
- Return that corresponds to the performance of Nifty 50 Index subject to tracking error

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Scheme Riskometer

Benchmark Riskometer

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investment of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

TRI: A group of securities, usually a market index, whose performance is used as a standard or TRI to measure investment performance of mutual funds, among other investments. Some typical TRIs include the Nifty 50, Sensex 30, BSE200, BSE500, 10- year Gsec.

Note: SEBI, vide clause 10.4.1.a of SEBI Master Circular on Mutual Funds dated June 27, 2024 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹99 per unit.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation: Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent/ updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/ securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Portfolio Turnover: Portfolio Turnover is a measure of how frequently assets within a fund are bought and sold by the managers.

R-Squared: R-Squared is a statistical measure that represents the percentage of a fund or security's movements that can be explained by movements in a TRI index.

Average Maturity: In a mutual fund containing debt securities, Average Maturity is the average amount of time until the debt securities mature.

Portfolio Yield: Portfolio Yield is computed by determining the cash flows for the portfolio and determining the interest rate that will make the present value of the cash flows equal to the market value of the portfolio.

Total Expense Ratio: Weighted Average i.e. Total Expense of the month / average Asset / number of days in month* days in a year.

How to read the factsheet

Macaulay Duration

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. It is the measure of bonds sensitivity to interest rate changes. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration can be calculated:

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \frac{t * C}{(1+y)^t} + \frac{n * M}{(1+y)^n}}{\text{Current Bond Price}}$$

Where:

t = respective time period

C = periodic coupon payment

y = periodic yield

n = total number of periods

M = maturity value

Current Bond Price = Present value of cash flows

Example Calculation

The calculation of Macaulay duration is straightforward. Assume there is a bond priced at ₹ 1,000 that pays a 6% coupon and matures in six years available at a Yield to Maturity (YTM) of 6%. The bond pays the coupon once a year, and pays the principal on the final payment. Given this, the following cash flows are expected over the next six years.

Cash Flow					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
₹ 60	₹ 60	₹ 60	₹ 60	₹ 60	₹ 60

With the periods and the cash flows known, a discount factor must be calculated for each period. This is calculated as $1 / (1 + r)^n$, where r is the interest rate and n is the period number in question. Thus the discount factors would be,

Discount Factor					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
0.9434	0.8900	0.8396	0.7921	0.7473	0.7050

Next, multiply the year's cash flow by the year number and by its corresponding discount factor to find the present value of the cash flow.

Period	Present value formula	Present Value
Year 1	$1 * ₹ 60 * 0.9434$	₹ 56.60
Year 2	$2 * ₹ 60 * 0.8900$	₹ 106.80
Year 3	$3 * ₹ 60 * 0.8396$	₹ 151.13
Year 4	$4 * ₹ 60 * 0.7921$	₹ 190.10
Year 5	$5 * ₹ 60 * 0.7473$	₹ 224.18
Year 6	$6 * ₹ 1,060 * 0.7050$	₹ 106.80

Sum these values = ₹ 5,212.36 = numerator Current Bond Price = sum of PV Cash Flows = $60 / (1 + 6\%)^1 + 60 / (1 + 6\%)^2 + \dots + 1060 / (1 + 6\%)^6 = ₹ 1,000$ = denominator Macaulay duration = $₹ 5,212.36 / ₹ 1,000 = 5.21$ A coupon paying bond will always have its duration less than its time to maturity. In the example above, the duration of 5.21 years is less than the time to maturity of 6 years.

SIP date every 1st business day of the month

SIP Returns are for regular plan. Past performance may or may not sustained in the future. Assuming ₹10,000 invested systematically on the first Business Day of every month over a period of time. Load is not taken into consideration for computation of performance. The above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC/Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or Guarantee protection against a loss in a declining market.

This Product Is Suitable For Investor Who Are Seeking [^]

- Capital appreciation over the long term
- Equity and Equity related securities covered by Nifty India Manufacturing Index
- Return that corresponds to the performance of Nifty India Manufacturing Index, subject to tracking error

[^] Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Navi ELSS Tax Saver Nifty 50 Index Fund

An open-ended passive equity-linked saving scheme with a statutory lock-in of 3 years and tax benefit replicating/tracking the Nifty 50 index

Investment Objective

The investment objective of the Scheme is to invest in companies whose securities are included in Nifty 50 Index (the Index) and to endeavour to achieve the returns of the index, though subject to tracking error. Investment in this scheme would be subject to statutory lock-in period of 3 years from the date of allotment to be eligible for income tax benefit under section 80 C. There is no assurance that the investment objective of the Scheme will be realized.

Fund Manager

Mr. Ashutosh Shirwaikar is the Fund Manager from February 14, 2025. Mr. Ashutosh Shirwaikar manages 16 schemes.

Performance as on June 30, 2026

period	Navi Nifty IT Index Fund - Regular Growth	Nifty IT TRI* [@]	Navi Nifty IT Index Fund - Direct Growth	Nifty IT TRI* [@]
1 Year CAGR %	-31.55%	-31.03%	-31.11%	-31.03%
Since Inception CAGR %	-10.79%	-9.82%	-10.15%	-9.82%
Current Value of investment if ₹ 10000/- was invested on Inception date	7723.30	7914.74	7,849.60	7,914.74
Current Value of Investment if ₹ 10000/- was invested 1 year ago	6845.20	6897.08	6,889.48	6,897.08

*In case, the start date or the end date of the concerned period is a non-business day, the NAV of the previous business day is considered for computation of returns. Past performance may or may not be sustained in future. The Direct Plan has a lower expense ratio as compared to the Regular/ Other than Direct Plan to the extent of distribution expenses, commission, etc. and no commission or distribution expenses for distribution of Units or distribution expenses are paid / charged under the Direct Plan. Standard TRIs prescribed are as per the applicable circular by SEBI. The performance of the Scheme is benchmarked to the Total Return variant of the Index TRI. @- Benchmark @@-Additional Benchmark.

SIP Returns as on June 30, 2026

SIP Tenure (in Years)	1 Year	Since Inception
Investment Amount	10,000	10,000
Total No. of Installments	12	27
Total Amount Invested	120000	270000
Present Value	93,644	1,98,824
Nifty IT TRI	94,004	2,00,839
Total No. Units	12,125	25,743
Yield (%)	-38.19	-24.25

SIP date every 1st business day of the month

SIP Returns are for regular plan. Past performance may or may not sustained in the future. Assuming `10,000 invested systematically on the first Business Day of every month over a period of time. Load is not taken into consideration for computation of performance. The above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC/Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or Guarantee protection against a loss in a declining market.

This Product Is Suitable For Investor Who Are Seeking [^]

- Capital appreciation over the long term
- Equity and equity related securities covered by Nifty IT Index
- Return that corresponds to the performance of Nifty IT index, subject to tracking error.

[^] Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Navi Nifty 500 Multicap 50:25:25 Index Fund

An open ended scheme replicating/ tracking Nifty 500 Multicap 50:25:25 index

Investment Objective

The investment objective of the scheme is to achieve return equivalent to Nifty 500 Multicap 50:25:25 Index by investing in stocks of companies comprising Nifty 500 Multicap 50:25:25 Index, subject to tracking error. There is no assurance that the investment objective of the Scheme will be achieved.

Fund Manager

Mr. Ashutosh Shirwaikar is the Fund Manager from February 14, 2025. Mr. Ashutosh Shirwaikar manages 16 schemes.

Scheme Details

Inception Date (Date of Allotment): 1st August 2024

Index: Nifty 500 Multicap 50:25:25 TRI

Minimum Application Amount: ₹100/- and in multiples of ₹1/- thereafter
Load Structure: Exit Load : NIL

Asset Allocation Pattern: Equity & equity related securities covered by Nifty 500 Multicap 50:25:25 Index Index: 95% to 100%
Debt & Money Market Instruments: 0% to 5%

Base Expense Ratio : Regular Plan: 0.90% | Direct Plan: 0.35%

For TER inclusive of GST please refer to page no. 37

Expense structure for Direct & Regular Plan may vary.

Portfolio Turnover Ratio (Times): 0.32

Net Asset Value (NAV)

as on June 30, 2026

Scheme

Direct Plan - Growth Option - - - - - 10.0632

Regular Plan - Growth Option - - - - - 9.9322

Fund Size (as on June 30, 2026)

Note: The Trustee will endeavor to declare the Dividend as per the specified frequencies, subject to availability of distributable surplus calculated in accordance with the Regulations. The actual declarations of Dividend and frequency will inter-alia depend on availability of distributable surplus calculated in accordance with SEBI (MF) Regulations and the decisions of the Trustee shall be final in this regard. There is no assurance or guarantee to the Unit holders as to the rate of Dividend nor that the Dividend will be paid regularly. Dividend payable under Dividend Payout of Income Distribution cum Capital Withdrawal option (Weekly Option) is equal to or less than 500 then the Dividend would be compulsorily reinvested in the option of the Scheme. In case an investor fails to specify his preference of Plans/Sub Plans/Options in the above mentioned schemes, the default Plan/Sub Plan/Options would be as above. * SWP/STP available only after completion of statutory lock-in period of 3 years from the date of investment by the investor.

*endeavours T+1
