Your monthly update on our Mutual Fund Schemes

July 2026

(Details as on 30th June 2026)

Rooted in strength, Shaping tomorrow!

Strength of **Large-cap** meets
the growth potential of **Mid-Caps**

Presenting

Nippon India Vision Large & Mid Cap Fund

The Nippon India Vision Fund uses a dual strategy, combining the strength of large-cap stocks with the growth potential of mid-caps. Large caps endeavor to provide stability & liquidity and mid caps can potentially generate relatively better return.

What the fund offers:

Dual Strategy:
Strength of Large caps,
growth potential of
mid-caps

Strategic Blend:
Industry leaders meet
emerging leaders.

Long-Term Vision:
Optimal mix of market
leaders & high quality
Mid cap companies

MARKET UPDATE

War Resolution, Sharp Decline in Oil Prices and Improvement in INR Outlook

The Iran war resolution was finally reached in Jun'26 with both the parties signing MoU to end conflict and agreeing to resolve the issues within two months' timeframe. This has resulted in sharp decline in geopolitical uncertainty. The opening of Strait Hormuz has resulted in resumption of sea route for trade. As a result, the oil prices have declined sharply easing concerns regarding stagflation globally. RBI preferred to remain on pause, while upwardly revising inflation projections and revising downward growth projections. RBI also launched slew of FX measures along with govt to boost FX flows, FPI flows in G-sec market, thereby resulting in improvement in currency outlook.

India:

Monetary: In early Jun'26 policy, the RBI hold policy rates and monetary stance unchanged. RBI projected FY27 growth to remain resilient at 6.6%/y/y (Apr policy: 6.9%/y/y) and has upwardly revised inflation projection to 5.1%/y/y (Apr policy: 4.6%/y/y) on war uncertainty and El Nino concerns. Addressing the foreign capital flow issue and pressure on INR, the RBI announced slews of measures to boost capital flows through FPIs in debt, NRI deposits and ECBs etc.

Balance of Payment: 4Q FY26 (Jan-Mar 2025) current account improved to positive 0.7% of GDP (seasonality) from deficit of 1.5% in 3Q FY26 (4Q FY25: +ve 1.4%). Robust net services exports and NRI remittances helped in reducing current account deficit (CAD).

FY26 CAD stood muted at 0.6% of GDP despite sharp rise in US trade tariff and Iran war. Capital account flows were marginal (FY25: US\$17 bn), due to net outflow of foreign investment and other items in capital account. As a result, BoP was negative by US\$24 bn (FY25: -ve US\$5 bn). This is the second consecutive year of negative flows, raising concerns about medium term macro-economic stability.

Foreign Trade: In May, the trade deficit remained elevated at US\$28 bn. During Apr-May 2026, both exports (oil & core) and imports (gold and core) grew double digit on the annual basis. During April-May 2026 period, the net services exports was modest at ~9%/y.

Fiscal: Apr-May 2026 Fiscal deficit stood at ~10% of BE FY27 (Apr-May 2025: ~1%). This was primarily due to robust expenditure (revenue & capital expenditure), while revenue receipts remained muted. On sources of funding fiscal deficit, YTD small savings and Others' collections are robust. The govt was holding robust cash balances (RBI dividend) indicating comfort in raising the funds.

Inflation: May CPI inflation increased to 3.9%/y/y (Apr 2026: 3.5%/y/y; Consensus: 4%/y/y). The rise in monthly print (0.75% m/m) was driven primarily by seasonal pick-up in food prices & impact of domestic fuel price hike. Core inflation (excludes food, fuel, petrol and diesel) rose to 3.90% y/y (Avg Jan-Apr 2026 ~3.7% y/y). Core-core inflation (excludes petrol, diesel gold etc) rose to 2.3% y/y (Avg Jan-Apr 2026 ~2.1% y/y).

Liquidity: Monthly average system liquidity in Jun 2026 moderated to ~Rs. 0.8 trn (Apr 2026: ~Rs. 3.9 trn; May 2026: Rs. 1.64 trn) on seasonality (advance tax outflows). Core Liquidity by June end decline to ~Rs.4. 5 trn from ~Rs. 5 trn at May end driven by RBI's FX swap maturity.

Foreign Flows: After three consecutive months of heavy outflows (cumulative Mar-May 2026 : -ve US\$24 bn), the FPI flows turned small positive in June (US\$0.5 bn) driven by resolution of Iran war and RBI's FX measures. YTD FPI outflows in the calendar year 2026 stood at US\$23 bn (as against outflow of US\$12bn in CY25).

Currency: INR appreciated by 0.8%/m/m in Jun 2026, after depreciating by 0.15%/m/m in May 2026, INR stood on an average 94.97 against dollar (May 2026: 95.60). YTD Calendar year 2026 INR has depreciated by ~5% driven primarily by the sharp rise in geopolitical concerns.

Fixed Income Market Update- Yield Levels & Spreads: After remaining elevated in April & May, the G-sec yield rallied in June on war resolution, sharp decline in crude prices, improvement in INR outlook and robust FPI inflows in G-sec (fiscal policy measures related to taxation, RBI's FPI measures related to G-sec (FAR Securities)). 10 yields moved in the range of 6.75%-7.02% (May range: 6.92%-7.08%). It closed the month much lower at 6.75% (Feb 2026: 6.66%; Mar & Apr 2026: 7.00-7.01%; May 2026:6.98%).

Taking cues from G-sec, SDL yields eased despite higher supply. 10-year SDLs moved in the range of 7.40%-7.74% (Prior month: 7.64%-7.83%). It closed the month lower at 7.40% (Feb 2026: 7.37%, Mar 2026: 7.61%; Apr 2026: 7.68%; May 2026: 7.72%). The average spread between 10 yr SDL over G-sec stood at 70 bps during the month (Apr 2026: 68 bps; May 2026: 72 bps).

Similarly, 10-year AAA bond yields moved in the range of 7.38%-7.83% (Prior month: 7.60%-8.00%) and closed the month lower at 7.38% (April 2026: 7.71%; May 2026: 7.83%).

Global:

Financial Markets: UST yield continued to remain volatile in June 2026 on resolution of Iran war and rate hike expectations. 10 yr UST close the month marginally lower at 4.44% (Feb 2026: 3.97%; Mar- Apr 2026: 4.35%-4.40%; May 2026: 4.45%).

After appreciating ~1%/m/m in May, DXY appreciated further by ~2.3% m/m in Jun 2026 on hawkish pivot of US Federal reserve. Calendar year till date the DXY has appreciated by ~3%.

After surging in Mar 2026 (~46%/m/m) & Apr 2026 ~14% m/m, the crude oil declined by ~9%/m/m in May 2026 and further by ~20%/m/m in June on resolution on Iran war and opening of Strait. The average crude oil declined to US\$85/ barrel (Apr 2026: US\$117/barrel; May 2026: US\$107/barrel).

Indian Fixed Income Market- Future Outlook:

- War resolution (although fragile), opening up of strait off Hormuz and sharp decline in oil prices has helped in improving macro stability outlook (growth, inflation & Current Account Deficit (CAD)) for India.
- Further, Govt and RBI's proactive measures to boost Foreign Exchange (FX) flows and FPI flows in G-sec market has already resulted in robust flows in G-sec markets and improvement in INR outlook.
- RBI's FX hedging policy for NRI FCNR (B) (Foreign Currency Non-Resident (Bank)) deposits & European Central Banks (ECB) may be expected to boost capital flows in Sep quarter and potentially support INR in near term.
- Going forward, the development of monsoon may be closely tracked on back of El Nino concerns.
- Foreign Exchange (FX) Measures undertaken in policy are primarily stop-gap arrangements to address currency concern. Over next 6-12 months, if macro-stability parameters do not improve, we may expect 50 bps rate hike.
- Aligning investment horizon with fund duration may help mitigate the impact of interest rate volatility. Short end of the curve, particularly debt funds with a duration upto 3 years look relatively better placed. Given the yield levels currently available, in the 20-30 year segment, investors with a long-term investment horizon may consider Long Duration products as part of their overall debt allocation strategy, subject to their investment objectives and risk appetite.

Macro and Equity Market Updates

GLOBAL MACRO & MARKETS

India's NSE NIFTY 50 Index ended the month of June 2026 in green (1.35%). Among major global indices, the Japanese NIKKEI (+5.6%), Morgan Stanley Capital International (MSCI) World (-0.8%), the Euro 50 (+4.60%) and the S&P 500 (-1.1%) ended the month of June 2026 with mixed returns. Performance fell among Emerging Market (EM) indices in June 2026, with the MSCI EM, Hang Seng, BOVESPA Brazil recording sequential returns of (-1.7%), (-9.1%), and (-1.0%) respectively.

The London Metals Exchange (LME) Metals Index fell (-6.0%) in June 2026. West Texas Intermediate (WTI) in red MoM, by (-20.4%) and Brent Crude fell MoM, by (-20.8%), respectively, as markets remained cautious given geopolitical uncertainty.

The Dollar Index rose by (+0.9%), through June 2026, with the US Dollar (USD) appreciating vis-à-vis Emerging Market (EM) currencies (-2.3%) and depreciating marginally against the Indian Rupee (INR) on the spot market (-0.4%).

Bond yields moved unevenly, with India's 10Y G-Sec yields fell by 25.40 bps, while US 10Y G-Sec yields climbing 2.97 bps, and the German Bund yield fell by -7.80 bps, with rates settling at 6.75%, 4.46% and 2.86%, respectively.

DOMESTIC MACRO AND MARKET

The BSE SENSEX climbed (+2.30%) in June 2026, in line with the NSE NIFTY Index. The BSE Mid-cap index & the BSE Small-Cap index, rising by (+1.1%) & (+5.3%), over the month of June 2026, respectively. Sector-wise, Banks, Realty and Healthcare were the top outperformers over the month of June 2026, clocking (+6.0%), (+6.0%) and (+5.0%) respectively. BSE Sensex's 13 major sectoral indices posted mixed performance in June 2026.

Net Foreign Institutional Investors (FII) flows into equities were negative for June 2026 at (-\$3.2 Bn), following (-\$3.45 Bn) in May 2026. Domestic Institutional Investors (DIIs) remained net buyers of Indian equities for the 34th consecutive month with flows of (+\$8.3) Bn in June 2026 compared to (+8.67 Bn) in June 2026.

India's high frequency data update:

Manufacturing Purchasing Managers Index (PMI) strengthened, GST collections remained robust on import revenue, core sector and industrial output rebounded, credit growth stayed elevated despite a slight moderation, while inflation edged higher and the trade deficit widened.

- **Purchasing Managers' Index Manufacturing PMI:** India's Manufacturing PMI for June 2026 eased to 54.2, down from 55.0 in May, marking the second-weakest expansion in four years. While the sector remained firmly in growth territory, softer demand - especially weaker export orders to Europe- dragged on output, new orders, and employment.
- **Goods and Services Tax (GST Collection):** Gross collections of INR 1.94 Tn (+13.9% YoY) in June 2026 the Gross Domestic Revenue stood at Rs 1.35 lakh crore, rose +6.5%, while Gross Import Revenue stood at Rs 0.60 lakh crore, marking a sharp rise of 34.6% during the month.
- **Core Sector Production:** The index of eight core sector industries grew moderately (+0.5% YoY) in May 2026, against a (+1.7% YoY) growth in April 2026. The production of Electricity, Cement and Steel recorded growth in May 2026. The production of Electricity, Cement and Steel recorded growth in May 2026 by (+8.7% YoY), (+8.4% YoY) and (+5.0% YoY) respectively.
- **Industrial Production:** Factory output growth as measured by the Index of Industrial Production (IIP) grew YoY by (+5.1%) in May 2026, vs a growth of (+4.9%) YoY in April 2026. The growth rates of the Four sectors, Mining & Quarrying, Manufacturing, Electricity & Gas Supply and Water Supply, Sewerage & Waste Management for the month of May 2026 are (-1.6%), (+5.5%), (+9.9%) and (+5.5%) respectively.
- **Credit growth:** Scheduled Commercial Bank Credit growth in June 2026 increased marginally to (+17.7 %) YoY vs (+16.2%) YoY in May 2026. Agriculture and allied activities credit in May 2026 grew by (+14.9%) YoY, while industrial sector credit grew by (+17.5%) YoY, the services sector credit grew by (+20.4%) YoY.
- **Inflation:** For May 2026, the Consumer Price Index (CPI) inflation rate rose YoY to (+3.93%), up from (+3.48%) in April 2026. Food inflation accelerated further to (+4.78%) YoY, compared to (+4.20%) in April. The Wholesale Price Index (WPI) inflation remained elevated at around (+9.7%) YoY compared to (+8.3%) YoY in April 2026. The positive rate of inflation in May 2026 was primarily due to increases in prices of mineral oils, crude petroleum & natural gas, basic metals, jewellery, vegetables, and housing costs, while deflationary trends were observed in items like potatoes, peas, and motor vehicles.
- **Trade Deficit:** Indian Merchandise Exports rose by (+18.0%) YoY to \$45.20 Bn in May 2026. Imports rose by (+20.0%) YoY to \$73.41 Bn. Merchandise+ services trade deficit fell to (-\$10.51) Bn, up from (-\$28.38) Bn in April 2026 and (-\$6.79) Bn a year earlier.

Events to watch out for in July 2026:

RBI MPC Meeting: The Reserve Bank of India's policy review will be closely watched as CPI inflation remains near 4%^ and food prices show stickiness due to monsoon variability. With repo rates steady at 5.25%\$, the committee's commentary on liquidity and growth may influence bond yields, banking stocks, and credit markets. The next MPC meet is expected to be held from 3-5 August, 2026.

Corporate Earnings Season (mid-July onwards): Q1 FY27 results begin with IT majors, followed by banks and industrials. Earnings will provide clarity on margins, credit growth, and global demand trends. Investor sentiment may hinge on management commentary around rural demand, monsoon-linked consumption, and export outlook.

Inflation & IIP Data (mid-July): June CPI and IIP releases will be critical for gauging domestic momentum. CPI trends may shape RBI's stance on rate cuts, while IIP will highlight industrial output strength or weakness. WPI data will also be tracked, especially for fuel and metals.

ITR Filing Deadline (July 31): The last date for filing income tax returns for FY 2025–26. Liquidity flows may be influenced by advance tax payments and filing activity, with penalties for late submission adding pressure.

Global Cues: US Fed commentary on inflation and interest rates may potentially drive capital flows into emerging markets. Crude oil prices remain a key risk for India's import bill, while geopolitical tensions in the Middle East and Europe: particularly the US-Israel-Iran conflict and the Russia-Ukraine war-continue to disrupt global trade flows and commodity markets. These developments may be expected to weigh on investor sentiment and India's external balances through the quarter.

Market Outlook:

- Domestic equity markets have remained range-bound with intermittent bouts of volatility. Sentiment improved as tensions between the U.S. and Iran eased, which led to softer energy prices and improving global risk sentiment.
- Lower crude oil prices, relatively stable rupee, healthy corporate balance sheets and expectations of supportive monetary policies have provided support to markets. However, any escalations in geopolitical events could keep the markets volatile.
- The Indian Rupee has remained relatively stable against the U.S. Dollar despite occasional fluctuations caused by global investment flows, while inflation has continued to ease, providing comfort to policymakers.
- While these factors may contribute to near-term market fluctuations, improving domestic demand, ongoing government capital expenditure and easing financial conditions may expected to support India's medium-term growth outlook.
- Following the market correction over the past several months valuations have become more reasonable particularly within the large-cap segment. While near-term earnings may face pressure from elevated input costs, currency weakness and softer global demand the medium- to long-term structural growth drivers for India remain intact.
- Given geopolitical challenges and its implications, long term investments may be invested systematically using the current corrective phase of the market. Fluctuations in commodity prices, supply chain disruptions, currency movements and global growth concerns are near term factors which may delay recovery. Hence a systematic approach to adding allocations might help in potentially lowering the anticipated volatility. The impact of war is visible on select segments; delayed resolution could lead to downgrade in earnings.
- Asset allocation in line with the risk appetite of the investor is an important tool to navigate any unanticipated volatility. Accordingly Large Cap & Large Cap oriented diversified strategies along with hybrid funds might appear to be better placed on risk-reward basis, while Mid/Small cap allocation may be considered in a staggered manner through systematic investment with a long-term view.

Monthly Performance for Key Indices:

Gold & Silver Outlook

After a strong five-year rally, gold (near US\$4,200/oz) and silver (around US\$65/oz) have entered a consolidation phase. The pullback is likely due to firmer inflation data, expectations of higher interest rates and a rotation from defensive assets into equities. However, the structural drivers behind both metals may remain firmly in place.

Gold: The Case for Strategic Ownership

Gold continues to be potentially supported by three key pillars. First, rising sovereign debt levels across both developed and emerging economies reinforce the appeal of an asset with no credit or counterparty risk. Second, central banks remain significant buyers as they diversify reserves away from the US dollar. Third, gold retains its role as portfolio insurance against inflation, financial instability, and geopolitical uncertainty.

An additional structural theme is emerging from global bond markets. As Japanese yields normalize, domestic investors may reduce purchases of overseas sovereign debt, potentially pushing global term premia higher. In this environment, gold may potentially serve as an alternative asset as confidence in government debt is reassessed.

Risks remain. Jewellery demand, particularly in India, has weakened due to elevated prices, while higher real yields reduce the attractiveness of a non-yielding asset. Temporary liquidity events may also trigger selling. The most significant near-term risk, however, could be stronger US dollar, which typically weighs on both gold and silver prices.

Silver: The Higher Beta Metal

Silver shares many of gold's monetary drivers but benefits from a powerful industrial demand story. Its use in solar panels, electronics, electric vehicles, power infrastructure, and AI-related data centres gives it a unique dual monetary-industrial character.

Dollar rebound in the near-term may potentially lead to further volatility and further declines in gold and silver, however, long term investors, consolidation may be an opportunity to potentially build strategic exposure.

Nippon India Large Cap Fund

Large Cap Fund	
Details as on June 30, 2026	
Type of Scheme	
An open ended equity scheme predominantly investing in large cap stocks.	
Current Investment Philosophy	
This is a large-cap fund, predominantly investing in stocks of the top 100 companies by full market capitalization. Large-cap stocks endeavour to provide stability and liquidity to the portfolio. It endeavours to generate alpha while owning the best of the index companies. It endeavours to invest in leaders or potential leaders with established business models and sustainable free cash flows. It endeavours to invest in growth companies at a reasonable valuation and with a high return on equity. It invests in emerging large-cap companies that have an established business model, a proven management track record, and the potential to generate high cash flows.

Nippon India Vision Large & Mid Cap Fund

Large & Mid Cap Fund

Details as on June 30, 2026

Type of Scheme

An open ended equity scheme investing in both large cap and mid cap stock.

Current Investment Philosophy

The fund is an open-ended equity scheme investing in both large-cap and mid-cap stocks. The fund attempts to invest in high-quality businesses that are market leaders in their respective sectors and have a proven track record across market conditions.

Large-cap stocks endeavour to provide stability and liquidity to the portfolio, and mid-cap allocations can potentially generate relatively better returns. Backed by fund management expertise and a growth-oriented strategy, the fund endeavours to generate relatively better risk-adjusted returns over the long term.

Nippon India Growth Mid Cap Fund

Mid Cap Fund

Details as on June 30, 2026

Type of Scheme

Mid Cap Fund - An open ended equity scheme predominantly investing in mid cap stocks.

Current Investment Philosophy

The fund endeavors to invest in mid cap companies that have the potential to substantially increase their profitability and have consistent track record. The fund focuses on identifying potential market leaders at an early stage with a view to create long term alpha. The fund attempts to identify growth stocks that are available at reasonable valuation, thus adopting a GARP (Growth at Reasonable Price) style for investing.

Small cap Fund	
Details as on June 30, 2026	
Type of Scheme	
An open-ended equity scheme predominantly investing in small cap stocks.	
Current Investment Philosophy	
The fund attempts to generate relatively better risk adjusted returns by focusing on the smaller capitalization companies. Small cap stocks, for the purpose of the fund are defined as stocks whose market capitalization is below top 250 companies in terms of full market capitalization. Small cap companies are potential mid caps of tomorrow and offer twin advantage of high growth prospects & relatively lower valuation. The fund focuses on identifying good growth businesses with reasonable size, quality management and rational valuation. The investment approach adopts prudent risk management measures like margin of safety and diversification across sectors & stocks with a view to generate relatively better risk adjusted performance over a period of time.

Nippon India Value Fund

Value Fund

Details as on June 30, 2026

Type of Scheme

An open ended equity scheme following a value investment strategy.

Current Investment Philosophy

The fund follows a value investment strategy with an aim to participate in investment opportunities across all sectors and market capitalization. The fund endeavors to invest in undervalued stocks having the potential to deliver long term relatively better risk-adjusted returns. Undervalued stocks will be identified based on the evaluation of various factors including but not limited to stock valuation, financial strength, cash flows, company's competitive advantage, business prospects, and earnings potential.

Multi Cap Fund	
Details as on June 30, 2026	
Type of Scheme	
Multi Cap Fund - An open ended equity scheme investing across large cap, mid cap, small cap stocks.	
Current Investment Philosophy	
The fund seeks to invest minimum 25% investment each in large, mid and small cap companies. Investment in large caps may help to capture market movements & aims to ensure liquidity in volatile times while exposure to niche themes (primarily mid/small cap companies) having scalable business models aims to offer alpha. The fund endeavours to identify opportunities ahead of the market. High conviction investment strategy with a focus on 'growth at reasonable valuations'.	
The fund follows a combination of top down and bottom-up approaches and aims to take active sector calls.

ELSS

Details as on June 30, 2026

Type of Scheme

An open ended equity linked saving scheme with a statutory lock in of 3 years and tax benefit.

Current Investment Philosophy

The fund seeks to maintain balance between large cap companies and mid cap companies. It endeavors to invest in potential leaders. It invests in companies with potential of high growth prospects over medium term (2-3 years). Generally, the fund has two or three sector calls at a time. They are mostly in-line of emerging market trends. A small percentage of portfolio is invested in contrarian calls.

A significant percent of outstanding equity of the scheme is invested in high conviction mid-cap companies. A significant allocation/exposure is taken in Multinational Companies (MNC's). It attempts to have a balanced portfolio on a macro basis, allocating to themes like Domestic, Consumption & Defensive.

Nippon India Banking & Financial Services Fund

Sector Fund

Details as on June 30, 2026

Type of Scheme

An open ended equity scheme investing in Banking & Financial Services Sector.

Current Investment Philosophy

The fund is a focused banking and financial services sector oriented fund investing across market caps within the sector. The fund is well diversified across sub segments like Private & Public Banks, NBFCs, Housing Fin Co's, Broking houses, Wealth Management, Rating Agencies, Asset Management Companies, Insurance Companies, Stock/ Commodities Exchange, etc. The fund endeavors to generate superior alpha through active fund management. The alpha generation is attempted through tactical allocation across various sub segments and differentiated investment ideas. The fund thus attempts to lower risk through diversification while retaining the alpha creation potential.

Nippon India Consumption Fund

Thematic Fund

Details as on June 30, 2026

Type of Scheme

An Open Ended Equity Scheme following consumption theme.

Current Investment Philosophy

The fund has a focussed approach to invest in leaders or potential leaders that are likely to benefit directly or indirectly from domestic consumption led demand. It is well diversified across key segments like Consumer Non-Durables, Media & Entertainment, Automobile, Healthcare Services, Pharmaceuticals, etc., driven by relative attractiveness of opportunities and valuations. The fund has a flexi cap structure, allowing it to participate across market caps. Strong business model that allows for good ROE generation will be the primary basis for investment. Businesses with focus on sustainable profitable growth will be the core components of the investment universe.

Nippon India US Equity Opportunities Fund

Thematic (International)

Details as on June 30, 2026

Type of Scheme

An open ended equity scheme following US focused theme.

Current Investment Philosophy

The fund endeavours to invest in a portfolio of high quality stocks listed on recognized stock exchanges of US. The investment strategy of the fund would be powered by the research support of MIA (Morningstar Investment Adviser India Private Limited, a group company of Morningstar Inc.). Morningstar employs their proprietary research methodology, focused on economic moats, to identify investment opportunity. The fund proposes to follow the Hare Strategy for its investments. The Hare portfolio invests in stocks of firms that are experiencing rapid growth, emphasizing those that possess sustainable competitive advantages.

Companies in this strategy tend to grow faster with both higher risk and higher return potential. The investment philosophy would be a blend of top down and bottom up approach without any sector or market capitalization bias.

Nippon India Active Momentum Fund

Thematic Fund

Details as on June 30, 2026

Type of Scheme

An open-ended equity scheme following momentum theme

Current Investment Philosophy

The Fund seeks to achieve long-term capital appreciation for its investors. This objective will be pursued by strategically investing in a diversified portfolio of equity and equity-related instruments. The selection of these instruments will be based on a quantitative model meticulously designed to identify potential investment opportunities that exhibit the potential for significant capital appreciation over the specified investment horizon.

Nippon India Low Duration Fund

Low Duration Fund

Details as on June 30, 2026

Type of Scheme

An open ended low duration debt scheme investing in debt and money market instruments such that the Macaulay duration of the portfolio is between 6 - 12 months. Relatively High interest rate risk and moderate Credit Risk.

Current Investment Philosophy

The fund endeavors to invest more than 80% in higher rated (AAA/A1+/equivalent) assets. A major part of the portfolio gets allocated in 0 - 9 months and 15 - 30% allocation is made in assets of 9 - 18 months maturity bucket, which aims to give the portfolio carry advantage and roll down benefit. The portfolio duration would be maintained between 180 - 365 days.

Nippon India Short Duration Fund

Short Duration Fund

Details as on June 30, 2026

Type of Scheme

An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 to 3 years. Relatively High interest rate risk and moderate Credit Risk.

Current Investment Philosophy

The fund endeavors to maintain portfolio duration between 1.25 - 2.5 years. The portfolio will have allocations to G-Secs/ SDLs/ High grade bonds primarily in the 1 - 5 years duration bucket. The fund will tactically use G-Secs/SDLs to generate alpha. The strategy is to enhance returns through asset allocation and shape of the curve.

Nippon India Credit Risk Fund (Existing Number of Segregated Portfolios - 1)

Credit Risk Fund

Details as on June 30, 2026

Type of Scheme

An open ended debt scheme predominantly investing in AA and below rated corporate bonds (excluding AA+ rated corporate bonds). Relatively High interest rate risk and Relatively High Credit Risk.

Current Investment Philosophy

The fund focuses on maximizing accrual with increased allocation to AA- and below segment, while maintaining duration of 1.5 - 2.5 years. The core mandate is to generate returns through accrual, hence low duration profile. Emphasis is on credit risk diversification.

Inception Date: November 15, 2004

Past performance may or may not be sustained in future. It is assumed that a SIP of ₹10,000 each executed on 10th of every month including the first installment in the Growth option of the Fund. Returns on SIP and Benchmark are annualized and cumulative investment return for cash flows resulting out of uniform and regular monthly subscriptions have been worked out on excel spreadsheet function known as XIRR. Load has not been taken into consideration.

B: Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI - Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns.

Nippon India Balanced Advantage Fund

Balanced Advantage Fund

Details as on June 30, 2026

Type of Scheme

An Open Ended Dynamic Asset Allocation Fund.

Current Investment Philosophy

The fund attempts to capitalize on the potential upside in equity markets while attempting to limit the downside by dynamically managing the portfolio through investment in equity and active use of debt, money market instruments and derivatives. A model based Dynamic Asset Allocation Fund that aims to offer three benefits: 1. Emotion free asset allocation through model based asset allocation. 2. Lowers downside risk through hedging. 3. Generates long term alpha through active stock selection and sector allocation. The fund follows an in-house proprietary model (which follows valuations & trend following) to determine unhedged equity allocation.

The fund maintains a large cap oriented portfolio diversified across sectors. The debt portfolio is managed conservatively, focused at the shorter end through investment in a combination of liquid and short term fixed income securities.

Nippon India Aggressive Hybrid Fund (Existing Number of Segregated Portfolios - 2)

Aggressive Hybrid Fund

Details as on June 30, 2026

Type of Scheme

An open ended hybrid scheme investing predominantly in equity and equity related instruments.

Current Investment Philosophy

The fund endeavors to generate relatively better risk adjusted returns by investing in a combination of Equities and Fixed Income instruments. The fund attempts to optimize the benefit of equity growth potential with relative stability of fixed income investments. On the equity space the fund aims to maintain a large cap oriented portfolio with a tactical exposure to emerging leaders to generate alpha. The fixed income strategy is focused on generating higher accrual through investments in high quality instruments with a moderate duration.

Nippon India Equity Savings Fund (Existing Number of Segregated Portfolios - 2)

Equity Savings

Details as on June 30, 2026

Type of Scheme

An open ended scheme investing in equity, arbitrage and debt.

Current Investment Philosophy

The fund seeks to invest in combination of Active Equities, Arbitrage Opportunities and Fixed Income Securities. The fund endeavors to capture the equity growth potential along with moderate volatility & regular income through investment in arbitrage opportunities and fixed income securities. The fund attempts to provide higher growth potential than debt funds due to moderate equity exposure and relatively lower volatility than equity funds through allocation to fixed income instruments & arbitrage opportunities.

Nippon India Arbitrage Fund

Arbitrage Fund

Details as on June 30, 2026

Type of Scheme

An open ended scheme investing in arbitrage opportunities.

Current Investment Philosophy

A conservative arbitrage fund that aims to generate income through arbitrage opportunities arising out of pricing mismatch in a security between cash and derivative segment and with derivatives segment along with investments in debt securities and money market instruments. The fund portfolio is completely hedged and takes offsetting positions on various markets simultaneously. The arbitrage fund follows a market neutral strategy and carries no specific equity risk. In the absence of adequate arbitrage opportunities, the scheme may invest in short term debt or money market securities.

Nippon India Multi Asset Allocation Fund

Multi Asset Allocation

Details as on June 30, 2026

Type of Scheme

An open ended scheme investing in Equity, Debt and Exchange Traded Commodity Derivatives and Gold ETF & Silver ETF

Current Investment Philosophy

The fund invests in a combination of Equity, Debt, International Equity, Gold ETF/ Exchange Traded Commodity Derivatives (ETCD), Silver ETF/ Exchange Traded Commodity Derivatives (ETCD) and other ETCDs as permitted by SEBI from time to time. Since these asset classes are weakly/ negatively co-related and tend to perform at different periods of time, the fund seeks to benefit from portfolio diversification. Given that asset allocation is the key to wealth creation, this fund would be an ideal offering for investors seeking a one stop solution to reap the benefit of Growth of Equity, Stability of Debt & Diversification from Commodities.

Nippon India Retirement Fund - Income Generation Scheme

Fixed Income - Retirement

Details as on June 30, 2026

Type of Scheme

An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier).

Current Investment Philosophy

The fund's investment objective is to provide capital appreciation and consistent income to the investors which will be in line with their retirement goals by investing in fixed income oriented portfolio with a low to moderate exposure (upto 30%) in equities. Thus the fund attempts to generate potentially higher returns by combining stability of fixed income along with growth possibilities of equities. On the fixed income allocation the fund will attempt to have an optimal blend of duration and accruals with investments in high quality instruments. The equity portfolio will be invested pre-dominantly in large cap companies with tactical allocation to mid cap stocks. The fund is well suited for investors in the post - retirement phase seeking regular income with lower volatility.

The scheme returns are inclusive of the impact of segregation of portfolio. For complete details, please refer SID/KIM of the Scheme.
Segregated Portfolio 1 - Impact of segregation on NAV is negative (0.56%). An amount of 4.30% of total exposure realized on Sep 16, 2020. The annual coupon amounting Rs 6.98 cr received on Jan 27, 2021. Entire due amount of Rs 93.78 Cr (Face Value + Accrued Interest) was received on January 27, 2022, subsequently all the units in this segregated portfolio were redeemed and the portfolio was closed, and the investors were duly paid in proportion to their holding.
Segregated Portfolio 2 - No impact of segregation on NAV beyond fair valuation of securities done on March 5, 2020.

Details as on June 30, 2026

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment.

B: Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI - Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns. It is assumed that a SIP of ₹10,000 each executed on 10th of every month including the first installment. Load has not been taken into consideration.

Returns on SIP and Benchmark are annualised and cumulative investment return for cash flows resulting out of uniform and regular monthly subscriptions have been worked out on excel spreadsheet function known as XIRR.

Brief on New Securities included in the Portfolio of Debt Funds

Vedanta Aluminium Metal Limited (VAML)

Rated by: AA+ by ICRA, AA by CRISIL, AA- by IND

Vedanta Aluminium Metal Limited (VAML) is a pure play aluminium company, formed pursuant to the demerger of the aluminium undertaking of Vedanta Limited. Post demerger, VAML houses the Group's entire aluminium value chain, including alumina refining, aluminium smelting, and downstream value-added products. The company operates large integrated assets such as the Lanjigarh alumina refinery and aluminium smelters at Jharsuguda and BALCO (Korba), with a combined smelting capacity of around 2.88 mtpa and significant captive power linkages.

VAML also holds the Group's interests in captive bauxite resources, which is expected to strengthen the cost competitiveness over the medium term. With its scale of operations, high degree of backward integration and focus on value-added products, VAML is positioned as one of the largest and lowest cost aluminium producers in India.

Performance as on June 30,2026

B: Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI - Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns.

The performance of the equity scheme is benchmarked to the Total Return variant of the Index.

Different plans shall have a different expense structure. The performance details provided herein are of Growth Plan (Regular and Direct Plan), except for Nippon India ETF Liquid BeES, where the performance provided are of Daily Dividend Re-investment Plan. For Exchange Traded Funds of Nippon India Mutual Fund, performance is provided at Scheme level using Dividend Reinvestment NAV's, since there are no separate plan/option under such Schemes.

Period for which scheme's performance has been provided is computed basis last day of the month-end preceding the date of advertisement.

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment. Performance of the schemes (wherever provided) are calculated basis CAGR for the past 1 year, 3 years, 5 years and since inception. Further (wherever applicable), Returns for 7 days, 15 days and 30 days are computed on a simple annualized basis. Dividends (if any) are assumed to be reinvested at the prevailing NAV. In case of LIQUID BEES, returns are based on gross dividend per unit declared by the Fund. Bonus (if any) declared has been adjusted. Performance of dividend option would be Net of Dividend distribution tax, if any. Face value of scheme is ₹10 / -per unit. Face Value of Nippon India Low Duration Fund is ₹1000 / -per unit. Face Value of Nippon India Money Market Fund, Nippon India Liquid Fund & amp; Nippon India Ultra Short Duration Fund is ₹1000 / -per unit w.e.f 5th Aug 2012. Face value of Nippon India ETF Junior BeES is ₹1.25 per unit. Face value of Nippon India ETF Liquid BeES is ₹1000. Face value of Nippon India Overnight Fund is ₹100 per unit. Face Value of Nippon India ETF Nifty BeES, Nippon India ETF Bank BeES, Nippon India ETF PSU Bank BeES, Nippon India ETF NV20, Nippon India ETF Hang Seng BeES has changed from ₹10 / -per unit to ₹1 / -per unit w.e.f 20th Dec 2019. Face value of Nippon India ETF Gold BeES has changed from ₹100 / -per unit to ₹1 / -per unit w.e.f 20th Dec 2019. In case, the start / end date of the concerned period is non - business day (NBD), the NAV of the previous date is considered for computation of returns. Schemes which have completed 6 months but not one year, performance details for the same are provided in simple annualised return as per existing guidelines. Performance details of closed ended schemes are not provided since these are not comparable with other schemes.

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other Investment. Dividends (if any) are assumed to be reinvested at the prevailing NAV. In case of LIQUIDBEEs, returns are based on gross dividend per unit declared by the Fund. Bonus (if any) declared has been adjusted. Performance of dividend option would be Net of Dividend distribution tax, if any. The performance of the equity scheme is benchmarked to the Total Return variant of the Index. Face value of scheme is ₹10/- per unit. Face Value of Nippon India Low Duration Fund is ₹1000/- per unit. Face Value of Nippon India Money Market Fund, Nippon India Liquid Fund & Nippon India Ultra Short Duration Fund is ₹1000/- per unit w.e.f 5th Aug 2012. Face value of Nippon India ETF Junior BeES is ₹1.25/- per unit. Face value of Nippon India ETF Liquid BeES is ₹1000/- per unit. Face value of Nippon India Overnight Fund is ₹100/- per unit. Face Value of Nippon India ETF Nifty BeES, Nippon India ETF Bank BeES, Nippon India ETF PSU Bank BeES, Nippon India ETF NV20, Nippon India ETF Hang Seng BeES has changed from ₹10/- per unit to ₹1/- per unit. w.e.f 20th Dec 2019. Face value of Nippon India ETF Gold BeES has changed from ₹100/- per unit to ₹1/- per unit w.e.f 20th Dec 2019. In case, the start/end date of the concerned period is non-business day (NBD), the NAV of the previous date is considered for computation of returns. Schemes which have not completed one year, performance details for the same are not provided. Performance details of closed ended schemes are not provided since these are not comparable with other schemes.

The performance of the equity scheme/s are benchmarked to the Total Return variant of the Index.

NA has been mentioned for scheme in existence for more than 1 year but less than 3 years or 5 years or instances where benchmark data for corresponding period is not available.

(4) The Scheme Returns are inclusive of the impact of Segregation of portfolio in the respective schemes. For impact on NAV on account of Segregation of portfolio, please refer SID/KIM of the relevant Schemes and detailed Performance of the respective schemes in this document.

DISCLAIMERS, STATUTORY DETAILS & RISK FACTORS

Exit Load – If charged, the same shall be credited to the scheme immediately net of Goods & Service Tax, if any.

Exit load levied on the Units redeemed will be the rate prevailing at the time of the allotment of the Units. For Special products registrations, load for each transaction is based on the load structure applicable as on the registration date.

Base Expense Ratio (BER): As on last day of the month, disclosed in accordance with Regulation 66(7) of SEBI (Mutual Funds) Regulations, 2026. BER denotes annualized asset management and other operational fees. Transaction brokerages, regulatory fees, and statutory taxes (including GST, STT, and Stamp Duty) are charged separately to the scheme on an actual's basis; they are not included in the Base Expense Ratio percentage displayed above. The stated BER should not be equated with the historical or comprehensive Total Expense Ratio (TER). **The Final TER is available in Annexure 1 on page 163**, you can find the full break down under the 'Investor Services' section of our official website at <https://mf.nipponindiaim.com/investor-services/downloads/total-expense-ratio-of-mutual-fund-schemes>

1. Base Expense Ratio as per Regulation 66(7) of SEBI (Mutual Funds) Regulations, 2026.
2. Brokerage Cost as per Regulation 66(9) of SEBI (Mutual Funds) Regulations, 2026.
3. Transaction cost incurred for the purpose of execution of trade as referred under Regulation 66(10) of SEBI (Mutual Funds) Regulations, 2026.
4. Present GST rate is 18 %.
5. Percentages mentioned above are annualized.
6. Base TER of direct plan shall have a lower expense ratio excluding distribution expenses, commission, etc., and no commission shall be paid from such plans

Tracking Error – 1 year Annualised Tracking Error based on daily returns. For the schemes which are yet to complete 1 year, Annualised Tracking Error is based on the data available.

Creation Unit Size - W.e.f May 1, 2023, the execution value for large investors must be greater than Rs.25 crores (except for Schemes managed by Employee Provident Fund Organisation (EPFO), India and Recognized Provident Funds, Approved Gratuity Funds and Approved Superannuation Funds under Income Tax Act, 1961)

Withholding Tax on distributed income by Mutual Fund Scheme: The Finance Act, 2020 has abolished dividend distribution tax on Income distribution by Mutual Fund scheme. W.e.f. 01.04.2020 any income distribution by Mutual fund scheme is taxable in the hands of investor and mutual fund scheme is required to withhold tax on such income distribution as per applicable tax rate.

Applicability of Stamp Duty on Mutual Fund Transactions: Stamp duty @ 0.005% of the transaction value would be levied on applicable mutual fund transactions, with effect from July 01, 2020. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase/switch-in transactions (including IDCW reinvestment) to the unitholders would be reduced to that extent. Kindly refer notice cum addendum no. 30, dated June 30, 2020.

Kindly refer addendum no. 63 dated September 28, 2012 for details about discontinued plan. Direct plan got introduced w.e.f. 01/01/2013. Kindly refer addendum no. 95 dated December 31, 2012 for details about direct plan.

Kindly refer addendum no. 66 dated June 11, 2015 for details about discontinued bonus plan/option.

As per AMFI Best Practices Guidelines Circular No. AMFI/ 35P/ MEM-COR/ 72 / 2022-23 dated December 31, 2022 on Standard format for disclosure Portfolio YTM for Debt Schemes, Yield of the instrument is disclosed on annualized basis as provided by Valuation agencies.

How To Read Factsheet

Alpha: Alpha is the measurement of an investment portfolio's performance against a certain benchmark—usually a stock market index.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

AUM: AUM or Assets Under Management refers to the recent/ updated cumulative market value of investments managed by a mutual fund or any investment firm.

Average portfolio price to book ratio (Average P/BV): It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

Average portfolio PE (Average P/E): P/E is the price to earnings ratio of the fund. A high PE ratio means investors are willing to pay more for each unit of earnings of the particular stock and are expecting higher growth in the future. Average P/E is calculated using weighted average method.

Average portfolio dividend yield (Average Dividend Yield): Dividend yield is the dividend paid per unit divided by the market price of the share. Average dividend yield is calculated using weighted average method.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Beta Ratio (Portfolio Beta): Beta is a measure of an investment's volatility vis-a-vis the market. In case of beta, value 1 suggests that a specific fund responds to market volatility equivalently, i.e. the shift in its price is equivalent to the benchmark movements. A value above 1 represents that a specific fund demonstrates a more significant shift in its price compared to benchmark movement. A value below 1 represents the opposite.

CAGR: stands for Compound Annual Growth Rate. Essentially, CAGR is the measure of an asset or investment's annual growth rate over a set period of time, while assuming compound growth.

Entry Load: Not Applicable In accordance with the requirements specified by the SEBI circular no. SEBI/IMD/CIR No.4/168230/09 dated June 30, 2009 no entry load will be charged for purchase / additional purchase / switch-in accepted by NIMF with effect from August 01, 2009. Similarly, no entry load will be charged with respect to applications for registrations under Systematic Investment Plans / Systematic Transfer Plans accepted by NIMF with effect from August 01, 2009. With reference to SEBI circular No. SEBI/HO/IMD/DF2/CIR/P/2019/42 dated March 25, 2019, there shall be no entry load for investments under SIPs registered before August 01, 2009 with effect from April 15, 2019. The upfront commission on investment made by the investor, if any, will be paid to the ARN Holder (AMFI registered Distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Exit Load: Exit load is a charge which is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption (or exit). For instance, if the NAV is Rs. 100 and the exit load is 1 %, the redemption price would be Rs.99 per unit.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

IDCW: Income Distribution cum capital withdrawal Options/Plans refers to distribution of income in a mutual fund scheme, which may include dividends paid by stocks, and capital gains made by selling underlying stocks in the portfolio.

Inflation: Inflation is a rise in price levels of goods/services that are required for day-to-day use. It primarily indicates the fall in the purchasing capacity of the rupee.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Modified duration: This is a formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration follows the concept that interest rates and bond prices move in opposite directions.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have subcategories.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

$$NAV = (\text{Assets} - \text{Liabilities}) / \text{Total number of outstanding shares.}$$

Net Equity: Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

Portfolio Turnover Ratio: The portfolio turnover ratio is the rate of which assets in a fund are bought and sold by the portfolio managers. In other words, the portfolio turnover ratio refers to the percentage change of the assets in a fund over a one-year period.

R Squared (R2): It is a statistical measure of how closely the portfolio returns are correlated with its benchmark. So, if the R2 of a model is 0.50, then approximately half of the observed variation can be explained by the model's inputs.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Riskometer: Riskometer is a graphical representation of the risk a mutual fund carries. The graph is designed as per the Association of Mutual Funds in India (AMFI) guidelines. It displays 5-levels of risk, with low representing the lowest risk on the diagram and very high the highest.

Rolling Returns: Rolling returns are the annualized returns of the scheme taken for a specified period (rolling returns period) on every day/week/month and taken till the last day of the duration.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance. A negative Sharpe ratio means the risk-free or benchmark rate is greater than the portfolio's historical or projected return, or else the portfolio's return is expected to be negative.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years, then over the three years he would invest Rs.18000.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Volatility: Volatility is a statistical measure of the dispersion of returns for a given security or market index. In most cases, the higher the volatility, the riskier the security.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

Sensex's Next 30,
now in the spotlight.

Nippon India BSE Sensex Next 30 Index Fund

Well-versed in the Top 30 from the BSE Sensex? But what about the potential that lies beyond?

Presenting **Nippon India BSE Sensex Next 30 Index Fund**, designed to capture the growth potential of large cap stocks beyond the Top 30, focussing on under-represented companies within prominent large cap benchmarks.

Invests in Sensex's next 30 stocks*

Exposure to under-represented large cap stocks

Diversification across sectors

Option to invest via SIP#

Low cost@
